

Risk Tolerance Questionnaire

About FinaMetrica

The FinaMetrica questionnaire provides a scientific assessment of your personal financial risk tolerance. The questionnaire is used by leading advisors in over 20 countries. More than one million risk tolerance questionnaires have been completed since 1998.

Your Financial Risk Tolerance Profile

The results of this risk tolerance questionnaire help your financial advisor to better understand you and make recommendations that are the right 'fit' for you. We recommend you discuss your risk tolerance profile with your financial advisor and find out how your risk tolerance fits with your asset structure.

In the questionnaire, you are asked about your attitudes, values and experiences. There are no right or wrong answers - it is more like having your pulse or blood pressure measured.

How the Questionnaire Works

The questionnaire is a series of easy to complete multiple-choice questions. Like all multiple-choice questionnaires, sometimes none of the answers will match exactly what you want to say. When that happens, choose the answer that is closest or 'best fit' to your response.

Similarly, give your 'best fit' answer for questions that ask about a situation that isn't relevant to you, or in situations where you would normally seek further information. Remember - there are no right or wrong answers.

Please answer all the questions. Choose the option that best indicates how you feel about each question. If none of the options is exactly right for you, choose the option that is closest.

- 1. Compared to others, how do you rate your willingness to take financial risks?**
 - 1. Extremely low risk taker.
 - 2. Very low risk taker.
 - 3. Low risk taker.
 - 4. Average risk taker.
 - 5. High risk taker.
 - 6. Very high risk taker.
 - 7. Extremely high risk taker.

- 2. How easily do you adapt when things go wrong financially?**
 - 1. Very uneasily.
 - 2. Somewhat uneasily.
 - 3. Somewhat easily.
 - 4. Very easily.

- 3. When you think of the word "risk" in a financial context, which of the following words comes to mind first?**
 - 1. Danger.
 - 2. Uncertainty.
 - 3. Opportunity.
 - 4. Thrill.

- 4. Have you ever invested a large sum in a risky investment mainly for the "thrill" of seeing whether it went up or down in value?**
 - 1. No.
 - 2. Yes, very rarely.
 - 3. Yes, somewhat rarely.
 - 4. Yes, somewhat frequently.
 - 5. Yes, very frequently.

- 5. If you had to choose between more job security with a small pay increase and less job security with a big pay increase, which would you pick?**
 - 1. Definitely more job security with a small pay increase.
 - 2. Probably more job security with a small pay increase.
 - 3. Not sure.
 - 4. Probably less job security with a big pay increase.
 - 5. Definitely less job security with a big pay increase.

- 6. When faced with a major financial decision, are you more concerned about the possible losses or the possible gains?**
 - 1. Always the possible losses.
 - 2. Usually the possible losses.
 - 3. Usually the possible gains.
 - 4. Always the possible gains.

- 7. How do you usually feel about your major financial decisions after you make them?**
 - 1. Very pessimistic.
 - 2. Somewhat pessimistic.
 - 3. Somewhat optimistic.
 - 4. Very optimistic.

-
8. **Imagine you were in a job where you could choose to be paid salary, commission or a mix of both. Which would you pick?**
- 1. All salary.
 - 2. Mainly salary.
 - 3. Equal mix of salary and commission.
 - 4. Mainly commission.
 - 5. All commission.
9. **What degree of risk have you taken with your financial decisions in the past?**
- 1. Very small.
 - 2. Small.
 - 3. Medium.
 - 4. Large.
 - 5. Very large.
10. **What degree of risk are you currently prepared to take with your financial decisions?**
- 1. Very small.
 - 2. Small.
 - 3. Medium.
 - 4. Large.
 - 5. Very large.
11. **You have an opportunity to make an investment that appears to be almost certain to produce a sizeable return. However, you have no funds to put towards this investment. One option is to borrow money for this purpose. How likely is it that you would do this?**
- 1. Very unlikely.
 - 2. Somewhat unlikely.
 - 3. Somewhat likely.
 - 4. Very likely.
12. **How much confidence do you have in your ability to make good financial decisions?**
- 1. None.
 - 2. A little.
 - 3. A reasonable amount.
 - 4. A great deal.
 - 5. Complete.
13. **Suppose that 5 years ago you bought stock in a highly regarded company. That same year the company experienced a severe decline in sales due to poor management. The price of the stock dropped drastically and you sold at a substantial loss.**
- The company has been restructured under new management and most experts now expect it to produce better than average returns. Given your bad past experience with this company, would you buy stock now?**
- 1. Definitely not.
 - 2. Probably not.
 - 3. Not sure.
 - 4. Probably.
 - 5. Definitely.

14. Investments can go up and down in value and experts often say you should be prepared to weather a downturn. By how much could the total value of all your investments go down before you would begin to feel uncomfortable?
- 1. Any fall in value would make me feel uncomfortable.
 - 2. 10%.
 - 3. 20%.
 - 4. 33%.
 - 5. 50%.
 - 6. More than 50%.

15. Assume that a long-lost relative dies and leaves you a house which is in poor condition but is located in a suburb that's becoming popular.

As is, the house would probably sell for \$300,000, but if you were to spend about \$100,000 on renovations, the selling price would be around \$600,000. However, there is some talk of constructing a major highway next to the house, and this would lower its value considerably.

Which of the following options would you take?

- 1. Sell it as is.
 - 2. Keep it as is, but rent it out.
 - 3. Take out a \$100,000 mortgage and do the renovations.
16. Most investment portfolios have a mix of investments - some of the investments may have high expected returns but with high risk, some may have medium expected returns and medium risk, and some may be low-risk/low-return. (For example, stocks and real estate would be high-risk/high-return whereas cash and CDs (certificates of deposit) would be low-risk/low-return.)

Which mix of investments do you find most appealing? Would you prefer all low-risk/low-return, all high-risk/high-return, or somewhere in between?

Mix of Investment in Portfolio

Portfolio	High Risk/Return	Medium Risk/Return	Low Risk/Return
<input type="checkbox"/> 1.	0%	0%	100%
<input type="checkbox"/> 2.	0%	30%	70%
<input type="checkbox"/> 3.	10%	40%	50%
<input type="checkbox"/> 4.	30%	40%	30%
<input type="checkbox"/> 5.	50%	40%	10%
<input type="checkbox"/> 6.	70%	30%	0%
<input type="checkbox"/> 7.	100%	0%	0%

17. You are considering placing one-quarter of your investment funds into a single investment. This investment is expected to earn about twice the CD (certificate of deposit) rate. However, unlike a CD, this investment is not protected against loss of the money invested.

How low would the chance of a loss have to be for you to make the investment?

- 1. Zero, i.e. no chance of loss.
- 2. Very low chance of loss.
- 3. Moderately low chance of loss.
- 4. 50% chance of loss.

18. **With some types of investment, such as cash and CDs (certificates of deposit), the value of the investment is fixed. However inflation will cause the purchasing power of this value to decrease.**

With other types of investment, such as stocks and real estate, the value is not fixed. It will vary. In the short term it may even fall below the purchase price. However over the long term, the value of the stocks and real estate should certainly increase by more than the rate of inflation.

With this in mind, which is more important to you - that the value of your investments does not fall or that it retains its purchasing power?

- 1. Much more important that the value does not fall.
 - 2. Somewhat more important that the value does not fall.
 - 3. Somewhat more important that the value retains its purchasing power.
 - 4. Much more important that the value retains its purchasing power.
19. **In recent years, how have your personal investments changed?**
- 1. Always toward lower risk.
 - 2. Mostly toward lower risk.
 - 3. No changes or changes with no clear direction.
 - 4. Mostly toward higher risk.
 - 5. Always toward higher risk.
20. **When making an investment, return and risk usually go hand-in-hand. Investments which produce above-average returns are usually of above-average risk.**

With this in mind, how much of the funds you have available to invest would you be willing to place in investments where both returns and risks are expected to be above average?

- 1. None.
 - 2. 10%.
 - 3. 20%.
 - 4. 30%.
 - 5. 40%.
 - 6. 50%.
 - 7. 60%.
 - 8. 70%.
 - 9. 80%.
 - 10. 90%.
 - 11. 100%.
21. **Think of the average rate of return you would expect to earn on an investment portfolio over the next ten years. How does this compare with what you think you would earn if you invested the money in one-year CDs (certificates of deposit)?**
- 1. About the same rate as from CDs.
 - 2. About one and a half times the rate from CDs.
 - 3. About twice the rate from CDs.
 - 4. About two and a half times the rate from CDs.
 - 5. About three times the rate from CDs.
 - 6. More than three times the rate from CDs.

22. People often arrange their financial affairs to qualify for a government benefit or to obtain a tax advantage. However a change in legislation can leave them worse off than if they'd done nothing.

With this in mind, would you take a risk in arranging your affairs to qualify for a government benefit or obtain a tax advantage?

- 1. I would not take a risk if there was any chance I could finish up worse off.
- 2. I would take a risk if there was only a small chance I could finish up worse off.
- 3. I would take a risk as long as there was more than a 50% chance that I would finish up better off.

23. Imagine that you are borrowing a large sum of money at some time in the future. It's not clear which way interest rates are going to move - they might go up, they might go down, no one seems to know. Given the two types of loans below, which are you likely to take?

- A variable interest rate that will rise and fall as the market rate changes.
- A fixed interest rate which is 1% more than the variable rate but which won't change as the market rate changes.

- 1. Definitely the variable rate.
- 2. Probably the variable rate.
- 3. Probably the fixed rate.
- 4. Definitely the fixed rate.

24. Insurance can cover a wide variety of life's major risks - theft, fire, accident, illness, death etc. Some insurance policies allow you to choose a "deductible" i.e. the amount of loss that the insurance company will not reimburse. The higher the deductible, the lower the cost of insurance. If you were making a choice today, what deductible would you choose?

- 1. Very small or no deductible - highest cost of insurance.
- 2. Small deductible - high cost of insurance.
- 3. Large deductible - low cost of insurance.
- 4. Very large deductible - lowest cost of insurance.

25. This questionnaire is scored on a scale of 0 to 100. When the scores are graphed they follow the familiar bell-curve of the Normal distribution shown below. The average score is 50. Two-thirds of all scores are within 10 points of the average. Only 1 in 1000 is less than 20 or more than 80.

What do you think your score will be? _____
